

## **Claims**

**What is claimed is:**

- 1. A process for International Investors in Fixed Income Securities (Bonds) To Use A Futures Market Hedge To Reduce Foreign Exchange Risk comprising the steps of:**
  - Foreign investor converts local currency to U.S. Dollar;**
  - Foreign investor purchases U.S. bonds from a securities broker-dealer;**
  - Investor recognizes the U.S. dollar depreciation risk;**
  - The investor (using the collateral of his bond portfolio) establishes a futures hedge position at an FCM on the investor's home currency, e.g. Japanese yen;**
  - The hedge is put in place against the depreciation of the U.S. dollar value of the bond portfolio; and uses the Futures Markets instead of the Inter-Bank to hedge the foreign exchange risk.**
